# ANTON SHEVCHUK

JUNIOR FRONT-END DEVELOPER

## ABOUT ME

A web developer who loves creating smooth experiences and focuses on details. I have been learning to code since the age of 15, because I always loved the idea of creating art, but in an interactive form.

## HOBBIES

► I enjoy photography, composing music, and writing poems.

The best thing about all these activities is creating something with my own hands and head. This is exactly why I chose to become a programmer.

## SKILLS

HTML5

CSS3

JavaScript

Vue.js

Sass

### Languages

English - C2      Ukrainian - Native

German - B1      Russian - Fluent

Polish - B1

## WORK EXPERIENCE

### ► Front End Development Intern

Hanover Medical School | May 2022 - present

At the Hanover Medical School (MHH) I develop web apps for doctors to use to interact and manage patients, wards and more. Currently I'm developing a way to see patient data using a modern and easy to use interface. Before they had to use SAP, an outdated and cluttered piece of software.

Also here I learned Vue.js and Sass to write code even more efficiently.

## EDUCATION

### ► Information Technology

School 61, Kyiv, Ukraine

The school that gave me the interest in programming, and inspired to become a developer

### ► Foreign Languages

School 106, Kyiv, Ukraine

This school helped me perfect my English, as well as start learning German, knowledge, that helps me perfect this language now.

### ► Front-End Development

ucode IT Academy, Kyiv, Ukraine

The school that gave me the interest in programming, and inspired to become a developer
